

AURA

Thank you very much for purchasing the **AURA X SOUNDS Vol. 1 - Virus TI soundset**

Ultimate X Sounds presents " **AURA X Sounds Vol.1** " for the Access Virus TI.

After 8 months of work i'm proud to present the first volume of the AURA library.

This time we wanted to create something entirely original in all regards.

Aura - is a must-have for composers writing cinematic, electronic, hybrid compositions and beyond that.

It is an intuitive and powerful hybrid musical sound design patches library aimed primarily at film, TV, video game and media composers.

Every single patch has been carefully designed.

Idea

The library has been designed to effortlessly layer in with your workflow, allowing you to load in a few patches to give your tracks that modern hybrid sound.

There is 192 patches with full of energetic sequences, gritty basslines, Clock rhythms, leads, pulses, FX, textures and some atmospheres.

We aim to provide cutting-edge digital electronic sounds for hybrid film scoring , atmospheric Electronica, Chillout, emotional Electronica, Trance, Progressive, Ambient , Film, Tv, Video Game but also it's flexible enough to fit in any music genre.

More about

It is about expanding the notion of what instruments and sound design be. Creating a new hybrid style of musical sound design that applies broadly across the spectrum of music.

The Aura is enhanced sound design art for Access Virus Ti

I wish you a lot of fun and fruitful, effective work with this soundbank.

The library contains (2 parts) 2 x 96 new patches for Access Virus Ti placed in several categories : SEQ , BASS SEQ, RHYTMS (Percussive and Melodic), FX, CHAOS, ATM & DRONES, CLOCK, Signature Sounds and more.

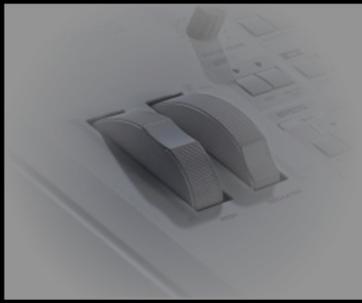

Sound categories include Impacts, Booms, Whooshbangs, Risers, Downers, Signature Sounds, Drones, Reverse FX, Tempo Synced Rhythms, Synth Arps, Synth Pads and SEQ Synth Basses.

Technical advice

This soundset supports modwheel, velocity and soft knobs. For enhanced usability the volume of all sounds have been carefully normalized. The high quality sounds are a hand-picked selection created by professional sounddesigner.

Not every patch is using soft knobs. There are cases where this does not make sense for vintage specific sound, and i did not assign it.

WHAT THE PRESETS ARE ?

Presets do not contain sampled audio (melodic or otherwise) but rather 'data' (synthesizer programs) that can be loaded using the Access Virus TI synthesizer. A collection of presets are collectively referred to as a bank

Made by UXS

All patches are made by **ULTIMATE X SOUNDS** – Sebastian Wichary
Music production and sound design for Music / Movies / Games.

File Menagement

Drag the user patch library (soundset) , which comes as a MIDI file (ending with .mid) into the following folder :

On MacOS X Library / Application /Support/Access Music/Virus TI / Patches

On Windows C...My Documentis /Access Music /Virus TI /Patches

Virus Control will recognize the new library next time you open it.

Run your DAW program like Logic, Cubase, Fl Studio and load the Virus TI as a VSTi .

You will see those banks on Virus TI VST browser.

About : 192 patches
Format ; 2 x mid.
Hardware ; Access Virus TI / TI2 / Snow
Requirements: OS 5.0.3.00 and above

Dear User !

**Please do NOT upload / torrent / share / replace / sell the library.
Think twice before you do something stupid.
I'm asking for it as a single (one man) developer. Please keep support my
work !**
